

Solar panel online apply New Zealand

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Do solar panels work in New Zealand?

Absolutely! New Zealand has abundant sunshine and generates between 1,700 and 2,100 sunshine hours annually. Some areas, like Nelson and Gisborne, receive as much as 2,400. Solar Panels don't require sunshine; they require daylight, so Solar Panels work year-round, even in the lower South Island.

Can I apply for a building consent to install solar panels?

We only accept online applications for a building consent to install photovoltaic (solar) panels. If you are unable to apply digitally, visit one of our libraries with council services for assistance in making your online application. See [Ways to pay online](#) for information on all payment options. [Apply online](#)

Are Waikato solar panels a good investment?

The Waikato installation team worked around some atrocious weather conditions to get the panels installed, and up and running, very quickly. Really good value for money. Great team to work with and very happy with the solar and battery systems installed. Great team to work with and very happy with the solar and battery systems installed.

Do solar panels need council consent?

Solar power systems typically don't require council consent. However, check with your local council or ask your solar installer. The energy output of a solar panel does not match the typical daily power use of a household or business. Solar energy output rises and falls with the sun and the weather.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

Different types of pv solar panels work within different types of solar power systems. There are typically three types of solar panel available in New Zealand: CPV solar systems. Unfortunately, all CPV solar systems and ...

At Harrison's Solar, we put you in control; we offer tailored and highly efficient solar solutions, ensuring maximum solar production year-round. Backed by our Harrison's Best Price Guarantee, you can confidently invest in premium solar ...
