Is solar energy a good option?

Solar power is environmentally friendly, available everywhere, and versatile. It is also, currently, the most expensive form of renewable energy-but costs are coming down and the energy source itself is free." -- Isabel Thomas

Does dark energy exist outside our Solar System?

The Moon and Mars were the two most likely candidates for life in the solar system; what exists beyond our solar system is mere guesswork. Dark energy is incredibly strange, but actually it makes sense to me that it went unnoticed, because dark energy has no effect on daily life, or even inside our solar system.

Is solar energy safe from terrorism?

The security companies and police SWAT teams that protect nuclear power plants must be alert to guard against terrorism. By contrast, solar energy is safe from terrorist attacks. There is nothing in a solar plant that could devastate the environment. A breakdown in a solar energy plant might mean a broken mirror.
