Bosnia and Herzegovina: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Nigeria has a huge power supply gap. About 60 percent of its 200 million people do not have access to electricity. And most who are connected to the national grid only get limited electricity at the best of times. This situation persists partly because the country's power infrastructure hasn't kept up with population growth. Demand ... Continue reading Brands We ...
