I would like 300-400Ah @ 12v for boondocking. I don't have any solar, but may add some later. I'm thinking about using the CALB 3.2V 180Ah LiFePO4 Battery Cells, probably in 2 banks in parallel to get 360Ah @ 12.8 volts. I found these cool 4S BMSs with Bluetooth, but their 120Ah rating looks insufficient for these 180Ah battery banks.

How Much Power Can A Solar Battery Produce? Solar batteries do not produce power. They store power generated from solar panels or the utility grid for use when needed. Power, or watt power (Wp), is calculated as Volts x Amps. Therefore a 100 Amp hour battery operating at 6 Volts can store 600 watt hours, or 0.6 kWh, of DC power.
