Will the 10th basic energy plan change South Korea?

In its current form, the 10th Basic Energy Plan that will come into force this year is unlikely to change that. The country needs more ambitious renewable energy targets, a sentiment also echoed by South Korea's biggest businesses. Fossil fuels widely dominate South Korea's energy mix.

How will South Korea transform its energy sector?

The country has unveiled an ambitious plan to transform its energy sectors, aiming to generate 70 per cent of its electricity from carbon-free sources by 2038. South Korea aims to have 30 nuclear plants by 2038 and to more than triple its solar and wind power output to 72 GW by 2030.

What percentage of South Korea's electricity comes from nuclear power?

Fossil fuels accounted for two-thirds of South Korea's electricity generation in 2021, and nuclear power accounted for 26%.

Should corporate renewable power purchase agreements be overhauled in South Korea?

This report outlines a comprehensive approach to overhauling corporate renewable Power Purchase Agreements (PPAs) in South Korea. It advises that, by adopting methods that align with international standards and practices, businesses will be encouraged to use more renewable electricity.

Who owns South Korea's power generation capacity?

KEPCO, through its six generating subsidiaries, owns around 70 per cent of the generation capacity, while the remaining capacity is accounted for by independent power producers and community energy systems. Figure 1: South Korea's installed generation capacity, as of early 2024 (%) Total installed capacity = 144.4 GW

Does South Korea have a nuclear power plant?

South Korea relies heavily on nuclear power for its electricity generation, with approximately 27 reactors operating in the country as of 2021. Nuclear energy accounts for nearly 30% of South Korea's total electricity production, making it a crucial source of power for the nation.

Fossil fuels are still at the top of South Korea's energy mix. Per Korea Energy Economics Institute (KEEI) February 2021 data, it comprises 82.5% of the said mix. ...
