

Solar power is becoming an increasingly popular choice for Australians to begin generating renewable energy at home. Australia is also conveniently well-suited for solar energy thanks to its ample sunlight and wide ...

Spain is undergoing a significant shift in its energy landscape with the launch of a massive solar power project that promises to transform the country's energy future. This ambitious initiative ...

A New South Wales council is set to receive almost \$15 million as part of a voluntary planning agreement with the developers of the 1 GW Tallawang solar and battery energy storage project proposed for the state's central west.

The Spanish parliament has rejected the Real Decreto-ley 7/2025, a package of measures designed to strengthen the country's grid and support battery storage deployment following the ...

Spanish renewables firm Zelestra said on Thursday it has signed a new virtual power purchase agreement (vPPA) with Graphic Packaging International, backing the construction of a 19-MWdc solar farm in Leon, northern Spain.

Solar technology manufacturing major Trinasolar has launched plans to build a 400 MW solar farm and 400 MW / 1.6 GWh battery energy storage system in the northern Wheatbelt region of Western Australia.

Ampere Energy y Bikote Solar se asocian para impulsar el almacenamiento industrial en el norte de España; La unión entre ambas compañías refuerza su posicionamiento en el sector comercial e industrial ...

In Spain, according to the National Integrated Energy and Climate Plan 2021-2030 (PNIEC 2021-2030), the forecasts we have for installation up to 2030 are to reach 39 GW of photovoltaic solar energy, with 12.12 GW already ...

For instance, Extremadura's solar-plus-storage farms now serve as both power generators and grid stabilizers, exemplifying the dual-value proposition of storage. Solar PV and the Power of ...

Renewable energy reached 80,885 MW installed in the Spanish electricity system at the end of September, according to provisional data from REE compiled in the quarterly report of the ...

"Spain has installed 30 gigawatts of solar in the past 10 years and there's hardly any batteries and there's hardly any connection with the rest of the continent," explained Segalen. "The system ...
