Rupert founded Arenko in 2015 to build a world class energy storage business. He is on the company's Board of Directors and is the Chief Executive Officer. Rupert leads the growth, strategy and direction of Arenko as well as having overall ...

Historical Skip Rates. Arenko has managed the Bloxwich asset (E_ARNKB-1) for many years. If we visualise the historical skip rate for the asset on the bid and offer, we can see that there has been significant improvement since the end of 2022, when the BM was effectively at a 100% skip rate. What you see below is a rolling 30 day window of the skip rate.

Rupert Newland, Founder and CEO of Arenko Group, said: "Arenko is proud to count Gresham House Energy Storage Fund, which owns and operates the largest portfolio of energy storage in the UK, among its clients which include multiple listed energy firms and specialist energy storage funds. This framework agreement exemplifies Arenko's strong ...

Companies like Arenko can already demonstrate this value, consistently delivering high financial returns for our customers in a fast-changing landscape through advanced digitised capabilities, in the following ways: Getting in early. Being the first to enter new (energy) markets generates returns prior to market saturation.

Arenko Group sells development rights on two new 50MW projects to Gresham House Devco (Gresham House). Arenko has also signed services agreements for the optimisation of these projects. Arenko, a leading battery software services provider to the global battery automation market, is pleased to announce that, following the sale of its 41MW Bloxwich ...

Arenko provides a market leading, automated battery controls and trading software that enables optimisation of the technical and financial performance of battery storage systems. By using AI, enhanced analytics and deep learning algorithms, their automation technology connects and optimises both the battery's technical and

Syria arenko group

commercial performance.

Arenko's analysis shows that in June this year this was happening, on average, around 80% of the time. A high percentages of skip rates creates a more carbon intensive grid but also means customers are paying more, as the increase in cost of energy on the grid is ultimately passed to the consumer.

Mike will have a central role in helping the Company deliver on its vision to provide a global platform that delights customers through intelligent control of energy assets and provides the [...]

In July 2016, the Syria-based jihadist group, (originally named Jabhat al-Nusra) changed its name to Jabhat Fateh al-Sham and allegedly cut ties with Al-Qaeda. It is an internationally sanctioned terrorist group (it is designated as a Foreign Terrorist Organization by the U.S.), second strongest in Syria after ISIS, seeking to replace the Assad ...

Roger joined Arenko in 2015 to solve what he sees as one of the greatest challenges facing humanity today: The rapid development of sustainable energy systems. Before joining Arenko, Roger spent three years running his own business in the renewables energy sector. Following this Roger spent three years developing and delivering innovative energy efficiency and [...]

Roger Hollies, CTO at Arenko Group, posted on LinkedIn that 1.5GW of batteries across NESO's network were able to inject power into the grid during the disruption, including 12 batteries on Arenko's Nimbus platform. According to BESSAnalytics, Arenko is the optimiser for around 333MW of BESS assets in the UK. ...

By Roger Hollies, CTO, Arenko. In the UK, there was a huge frequency event (49.63Hz) on Thursday 8th June 11:38 caused by a loss of power to the grid slowing the speed of the grid down like the engine of a car hitting a steep hill. Industry data points towards a 1.4GW instant loss of power from the North Sea Link interconnector.

Syria arenko group

Rupert Newland, chief executive at Arenko Group, said: "Arenko's new battery system will provide much needed flexibility to the UK grid, reducing waste and helping to make energy bills cheaper for households and businesses. This project is very significant in addressing the UK's long-term energy security concerns, enabling the transition ...
