

Invented in the Alps in the late 19th century, Switzerland opened a pumped storage plant in 2022 called Nant de Drance that can deliver 900 megawatts for as long as 20 hours. Nant de Drance stores surplus energy ...

**Making waves: Inertia's value in Pumped Storage Hydro** In this contributed article, Mark Macaulay, partner, Adam Brown, counsel, and Roddy Cormack, senior associate, from the projects team at law firm Dentons address the market ...

While PtP lags behind batteries and pumped hydro in terms of efficiency and cost, OIES stresses its strategic value. In grids with high renewable penetration, hydrogen-based storage offers unmatched long-duration capabilities and grid ...

Pumped storage projects move water between two reservoirs located at different elevations (i.e., an upper and lower reservoir) to store energy and generate electricity. Generally, when electricity demand is low (e.g., at ...

Pumped hydro storage is a long-established method of electricity storage, but its reliance on geographical factors limits its large-scale deployment due to various barriers. In this study, a ...

Quidnet Energy is developing an alternative approach to energy storage by storing water to deliver energy. This new form of sub-surface pumped hydro storage enables large-scale deployment of renewable energy and ...

According to the State Grid, the substantial capital injection will be entirely allocated to the construction of pumped-hydro energy storage projects. This initiative is seen as crucial for ...

Iberdrola has started approval processes for a 1.32 GW pumped-hydro storage project in Portugal. The Proyecto de Aprovechamiento Hidroelctrico de Minhau is set to become the ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems with a 90-billion-baht investment. This effort aims to stabilize the clean energy supply, ...
