2:01 Eaton's Seismic Engineering team helps customers from pre-bid and project review to design and product selection. Learn how Eaton can help speed installation, reduce complexity and maximize the return on your investment on your next mechanical, electrical or ...

At ISAT, we specialize in delivering advanced seismic bracing solutions that adhere to the rigorous standards set by organizations like the American Society of Civil Engineers (ASCE), International Building Code ...

Seismic Bracing systems are specifically designed and engineered to brace and secure suspended non-structural equipment (VAV boxes, fans, unit heaters, small in-line pumps, etc.) and components (HVAC duct, conduit/ ...

The global seismic cabinets market is gaining momentum, propelled by an increasing focus on equipment safety in high-risk zones. Market drivers include heightened regulatory enforcement ...

Watch the training video to learn when seismic bracing is required, explain NFPA 13 standard for Fire Sprinkler Systems, explain IBC and ASCE 7 standards for Mechanical, Electrical and Plumbing (MEP) Systems and understand approvals and compliances. 0:49 Why is ...
