Renewable energy capacity is around 23% of the total installed capacity. Renewable energy in Thailand relies primarily on domestic production, namely solar, wind, small and large hydropower projects, biomass, biogas, and waste-to-energy. The country also imports hydropower from Lao PDR. Thailand has renewed its focus on increasing its renewable ...

The company created SB Energy in October 2011 in response to the Great East Japan Earthquake, which took place on 11 March that year. SB Energy director and chairman Masayoshi Son said: "The Great East Japan Earthquake has driven us to establish SB Energy to build a model case for the promotion of renewable energy and also contribute to an increase in ...
