The decommissioning of Cottam power station in Nottinghamshire released spare grid connection capacity in the region. Tillbridge Solar Limited - a joint venture partnership between Tribus Clean Energy and Recurrent Energy (a Canadian Solar company) - has designed a solar power and battery storage project to make use of the available connection capacity.

Last month, Tribus greatly reduced its environmental impact by replacing all the lights in its factory with LED. At the same time, Tribus mounted 550 solar panels on its factory roof. The switch from high-energy lights to energy-efficient LED's has led to an instant drop of Tribus' total energy consumption of almost 40%. The energy

Niger: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Tribus Clean Energy is one of very few businesses that has taken large scale solar and battery projects from initial concept all the way through the consenting process. Multiple stages. Expertly and responsibly handled. The first step is to identify potential locations for large scale solar and battery sites. This is not as easy as it might appear.

This webpage provides information on our proposals for a new energy storage project located on land South of Torksey Ferry Road, Cottam and land East of Chequers Lane, Laneham, Nottinghamshire. We will soon be consulting on our proposals and are keen to hear your feedback.

Access to energy is a cornerstone in achieving food security and eliminating hunger. Not only is energy essential for food consumption--much of the food distributed by the World Food Programme (WFP) requires cooking--but it also plays a vital role throughout food systems in production, processing and preservation.
