Researchers identified 13 critical vulnerabilities in Tridium's widely-deployed Niagara Framework that could allow attackers to compromise building automation systems and collect sensitive network data.

By J.D. Flynn Denver, Colo., Mar 28, 2024 / 04:00 am (CNA). At the end of the season of Lent -- and right before Easter -- the Catholic Church observes the "sacred triduum." Many Catholics have questions about what ...

Phishing attacks are evolving rapidly, allowing cybercriminals to bypass traditional security systems like email filters and static defenses. As a result, many businesses are left vulnerable to credential theft, often without realizing the ...

Two high-severity vulnerabilities in TP-Link VIGI network video recorder (NVR) systems could allow attackers to execute arbitrary commands on affected devices. The security flaws, identified as CVE-2025-7723 and CVE-2025 ...

Connect your members to quality behavioral health preventive and supportive services. Our tech-enabled platform can transform your current behavioral health ecosystem and deliver real-time access across the acuity ...

Key features often include performance metrics, automated testing, end-to-end transaction tracing, and comprehensive reporting. API monitoring tools are crucial for maintaining the health and efficiency of modern applications that rely ...

CISA has added a critical Fortinet FortiWeb vulnerability to its Known Exploited Vulnerabilities (KEV) catalog, confirming active exploitation of the SQL injection flaw in cyberattacks worldwide.
