Talesun Solar, a leading PV module manufacturer, announced that the company has supplied solar modules for a Turkey's largest solar-hydro hybrid project, which is installed with a capacity of 80MW and built next to a 510MW hydroelectric plant. The hybrid project has been grid-connected recently, and is invested by Cengiz Energy, a subsidiary ...

Solar energy is becoming a central pillar of Turkey's energy strategy, especially for meeting peak demand efficiently. While the global solar market is projected to add 593 GW of new installed capacity in 2024 (a 29% increase from 2023), new solar investments in Turkey have played a significant role in meeting the 2024 peak demand.

In the first eight months of 2024, Turkey's solar energy generation surged by over 40% compared to the same period in 2023, contributing to meeting record-high electricity demand during summer. ... Storage would extend the effectiveness and usage time of solar energy, simplifying grid management and enabling surplus renewable energy to be ...
