

Are China's battery projects based on US trade ties with Morocco?

The Chinese battery projects include at least three joint ventures and several that reference Morocco's trade ties with the United States. The largest among them is Chinese-German battery-maker Gotion High-Tech, which signed a deal with Morocco last year for USD 6.4 billion investment to construct Africa's first electric vehicle battery factory.

Will Morocco build a lithium refinery & cathode plant?

Morocco gained a further boost on Sunday after South Korea's LG Chem and China's Huayou Cobalt said they would build a lithium refinery and cathode materials plant in the country.

Is CNGR launching a new EV plant in Morocco?

By contrast, in Morocco "we may have ground breaking already next month", he said. The plant, in which CNGR will jointly invest with Al Mada, a conglomerate owned by the Moroccan royal family, will generate enough material for 1mn EVs a year. Lahrs added that there was significant potential to expand beyond that.

Will Morocco become a car manufacturing hub?

Expanding on infrastructure that has made Morocco a car manufacturing hub, they hope to meet growing demand and overcome rules designed to exclude them from the incentives the Inflation Reduction Act is injecting into the U.S. car market, the world's second-largest.

Should Morocco invest in electric cars?

As the world transitions to electric vehicles, Morocco may appear to be a surprising beneficiary as China, the United States and Europe compete for market share. But its officials worry that anti-competitive policies like tariffs and subsidies could ultimately make it more difficult to lure investment.

Why does Morocco need a US presence?

For the latter, a presence in Morocco would also enable them to continue supplying American groups. In 2006, Morocco signed a free trade agreement with Washington, in which strategic minerals and battery components feature on the list of products exempt from American customs duties.
