

United States smart energy usa

How many smart meters are installed in the United States, and who has them? In 2022, U.S. electric utilities had about 119 million advanced (smart) metering infrastructure (AMI) installations, equal to about 72% of total electric meters installations. Residential customers accounted for about 88% of total AMI installations, and about 73% of total residential electric meters were AMI meters.

The past year has seen an up-tick in United States utilities' smart meter initiatives. In fact, about 50% of the states have utilities with some smart metering pilots or installations. Much of this activity still remains in the pilot stage, but if each of those utilities fully implemented smart meters for all their customers, it would include more than 42 million electric ...
