A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.

That is not the purpose of the UPS. Some UPS require power to turn on, then they supply an output. If you turn the UPS on without AC power, that isn't an Uninterruptible Power Supply, that's a Portable Power Supply. They are programmed differently for different environments. A UPS is for power surges, not meant for long durations.

Ups power supply for home Guadeloupe

The basic idea of a UPS is that when a system loses electrical grid power, the UPS kicks in immediately with battery backup power and ensures the system does not suffer a catastrophic power failure. This gives system administrators precious time to restore power with a dedicated generator or take the system through an orderly shutdown protocol ...

Guys i did a clean install because i was curious. At stock windows (installed the GPU driver and the automatic updates) can recognize my UPS, there is a battery icon on the tray and it can recognize when the UPS switches from grid to battery power (or vica versa), but cant recognize battery charge level, its always on 100% and it cant automate shutdown or hibernation (which ...
