

Using clean energy

With solar becoming a dominant player in a clean energy future, it's fair to wonder what the carbon footprint of solar panels is. Is solar energy that much cleaner than fossil fuels like natural gas and coal? How much carbon ...

Photo: State House President Samia Suluhu Hassan listens to Deputy Prime Minister who is also Energy Minister Doto Biteko shortly before launching National Strategy for the Use of Clean Energy for Cooking in Dar es ...

The South African public electricity company Eskom announced on Wednesday (July 16) its plans to transition primarily to clean energy sources by 2040, moving away from its current fleet of ...

Geothermal energy isn't just for clean power--it can also drive carbon removal. New research from the Clean Energy Conversions Lab shows that pairing geothermal with direct air capture ...

Transitioning to a decarbonised energy system by around 2050 is expected to save the world at least \$12 trillion, compared to continuing our current levels of fossil fuel use, according to a peer-reviewed study by Oxford ...

In late 2022, the Inflation Reduction Act created many significant changes intended to help businesses and individuals invest more money in clean, energy-efficient improvements. This includes extending the federal tax credit ...

The One Big Beautiful Bill is quickly sunseting tax credits for all sorts of clean energy purchases--from EVs and heat pumps to batteries and solar panels. If you want to claim them, here are ...

Alternative energies include renewable sources --such as solar, tidal, wind, biofuel, hydroelectric, and geothermal --and nonrenewable nuclear power (considered alternative but not renewable because it relies on uranium, ...

Oklo is forming strategic energy partnerships with Liberty Energy and Vertiv to deliver clean, reliable power. With scalable nuclear technology, it's helping industries transition to a net-zero future.

What Is a Sustainable Energy Transition? The sustainable energy transition refers to the transition from unsustainable energy sources to those that are sustainable, renewable, and/or "green," such as geothermal, wind, solar, ...

India Electric Vehicles: A new report reveals that India can adequately charge its entire projected electric

Using clean energy

vehicle (EV) fleet by 2032 using only 3% of its solar and wind energy targets, emphasizing the importance of daytime charging and ...

Is Capital Clean Energy Carriers Using Its Retained Earnings Effectively? Capital Clean Energy Carriers has a low three-year median payout ratio of 19% (or a retention ratio of 81%) but the ...

The energy sector is going through a transition that will likely take decades. TotalEnergies is using its oil profits to fund its clean energy investments. Enbridge is focused on providing both ...

Companies are using advanced technology to drill many miles underground to reach the hot rock below. Their quest is to make clean, abundant geothermal energy available anywhere on the ...

Clean Energy has committed to using the proceeds solely for business development and working capital, explicitly prohibiting repayment of indebtedness to officers, directors, or employees, or ...

A new UN-backed report highlights a growing shift in the global energy landscape, with fresh data showing clean energy investment outpacing fossil fuels and renewable technologies becoming ...
