

Melbourne-headquartered infrastructure and energy investment firm Kai Global and South Korea's Wide Creek Asset Management have launched a \$500 million joint venture dedicated to solar ...

SCADA systems have long been the backbone of industrial process control, including in utility-scale PV systems. They are designed to collect real-time data from various sensors and ...

The Breckinridge Circuit Court ruled in favor of the Breckinridge County Fiscal Court last week following a lawsuit filed to attempt to overturn its ordinance regulating large scale solar energy ...

The utility-scale solar industry continues to demonstrate remarkable momentum, with 9 GWdc of new capacity installed in Q1 2025 alone. While this represents a 7% decline from the previous year, the sector remains a cornerstone of the ...

Reinerstrom est#225; liderando una nueva era en la energ#237;a solar en Guatemala, impulsando el sistema de "Uber" esta vez como un modelo de negocio innovador donde #171;todos ganan bajo ...

Peak production is one of the shared goals of stakeholders across the utility-scale solar value chain, but with site conditions becoming increasingly challenging, it's a more complex goal ...

See how we are helping make solar power a reality in utility, commercial and residential applications. When you work with Eaton, you have access to a complete electrical portfolio - providing the connection from the ...

ABB's three-pole DC switch-disconnector is designed for 2,000-V utility-scale photovoltaic power plants, enabling increased power output while reducing electrical balance of system costs by ...

Global average solar LCOE stood at \$0.043/kWh in 2024, says IRENA The International Renewable Energy Agency's latest report finds little change in the global average levelized cost of electricity for utility-scale solar ...

The Hi-MO 9 module, LONGi's flagship offering for utility-scale projects, incorporates cutting-edge back contact (BC) technology to deliver superior energy output, enhanced temperature ...

Solar power is going to play a huge role in the future of the Irish energy industry, with at least 8GW of capacity to be delivered by 2030 according to current targets. This will come through multiple pipelines, from small scale ...
