

What obstacles are utility-scale solar projects currently facing? A disconnect has emerged between supply and demand in the utility-scale solar segment, leading to price cannibalisation ...

SPE expects EU solar installations to fall to 64.2 GW in 2025, ending its decade-long growth streak Falling power prices and incentive cuts hit residential solar in several markets, including ...

Peak production is one of the shared goals of stakeholders across the utility-scale solar value chain, but with site conditions becoming increasingly challenging, it's a more complex goal ...

It resulted in a residential rooftop market collapse of over 60% versus 2023 in most of the group. Similarly, Poland, Spain, and Germany are experiencing a decline of over 40%. Good news ...

Spain has built numerous utility-scale solar farms thanks to its sunny climate and robust EU support. Nationwide, significant investments in solar infrastructure have been prompted by clean energy policies and electricity market reforms.

A request for proposals from six qualified bidders interested in developing a 22.5 MW solar-plus-battery project is now live in the Cayman Islands. The project will be the islands' largest solar ...

Similarly, Poland, Spain, and Germany are experiencing a decline of over 40%. The new analysis predicts that utility-scale solar is expected to continue growing in the EU this year. In 2025, the ...

British Solar Renewables reached financial close on 12-project solar portfolio with three co-located battery energy storage system (BESS) assets. The GBP 345 million financial package covers ...

Renewables developer Edify Energy has unveiled plans for a major 2.4 GWh solar and integrated battery energy storage facility in Australia, adding to its growing portfolio of power generation ...

New data from the Spanish Photovoltaic Union (UNEF) paints a nuanced picture of a market in transition. While total battery capacity installed alongside rooftop solar fell by 34% in 2024 to ...

pvDesign is the end-to-end software to design & engineer utility-scale PV. At RatedPower we are on a mission to accelerate the energy transition by increasing the global solar energy capacity ...

The new analysis predicts that utility-scale solar is expected to continue growing in the EU this year. In 2025, the segment will likely contribute to around half of all new capacity additions. ...

Utility-scale solar spain

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms. With an industry-leading ...

Global average solar LCOE stood at \$0.043/kWh in 2024, says IRENA The International Renewable Energy Agency's latest report finds little change in the global average levelized cost of electricity for utility-scale solar ...

Spain is moving toward a renewable energy model, with a growing role for solar photovoltaics, both large-scale and for self-consumption. Achieving the ambitious 2030 goals will depend on ...

The emirate of Sharjah has commissioned its first utility-scale solar plant to power the Sajaa Gas Complex and export surplus electricity to the grid. The 60 MWp SANA facility, developed in ...

Watson Farley & Williams ("WFW") advised Capital Dynamics on a ca. EUR110m+ financing granted to them by Norddeutsche Landesbank Girozentrale ("NORD/LB"), for the development of a ...

This decision comes in response to a large-scale blackout that occurred in April of this year. The Spanish Battery Energy Storage Association (AEPIBAL) has hailed the new regulation as a ...
