Does Vanuatu have a good solar energy resource?

Vanuatu generally has a good solar energy resource for all islands. Vanuatu's Meteorological Services has collected solar insolation data at several sites for many years using high-quality pyranometers.

Can coconut oil be used for community-level electricity generation in Vanuatu?

Coconut oil (CNO) appears to be technically feasible for community-level electricity generation in Vanuatu but, but as shown in the Port Orly system in Espiritu Santo (described in Section 3.3), a combination of technical, social and economic factors, may make it impractical for remote communities.

Does Vanuatu have a wind energy potential?

The large amount of wind energy data that has already been collected be located, assembled at DoE, professionally analyzed, maintained in a database and a report be produced on Vanuatu's practical wind energy potential with locations and gaps in coverage clearly shown.

Does uncertainty calibration matter for solar power simulations in Vanuatu?

Table 2: Summary of uncertainty calibration for solar power simulations in Efata#233;, Vanuatu. Since only monthly production totals were available for wind it was not possible to test the uncertainty calibration due to having an insufficient number of samples to make a meaningful comparison.
