

Can solar energy be used for different applications in Palestine?

These values are encouraging to exploit the solar energy for different applications. This study highlights that the main renewable energy sources in Palestine are solar energy, wind energy and biomass, thereby the energy dependence on neighbouring countries may significantly decrease, when Palestine uses the available renewable energy sources.

What is the potential for solar energy in Palestine?

There is high potential for solar energy in the Palestine, with a daily average solar radiation of 5.4 kWh/m² which should encourage its use for mass applications like cooking, industrial and domestic heating, water pumping, rural electrification, desalination etc.

Is Palestine a good place to invest in solar energy?

Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

How much PV power can be produced in Palestine?

In Palestine, the average values of specific PV power production from a reference system, described in Table 2, vary between 1700 and 1765 kWh/kWp for the selected three areas. A maximum value of energy that can be produced in Gaza and in the very southern region of the West Bank is higher than 1800 kWh/kWp.

How much wind energy is used in the Palestinian territories?

It has been estimated that wind energy has the potential to account for 6.6% of energy usage in the Palestinian Territories.

What is solar water heating in Palestine?

Palestine receives about 3,000 hours of sunshine per year and has an average solar radiation of 5.4 kWh/m. Domestic solar water heating (SWH) is widely used in Palestine where almost 70% of houses and apartments have such systems. In fact, Palestine is one of the leading countries in the field of SWH for domestic purpose.

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector.
