Hubble Timeline Follow Hubble's journey from an idea of a 'Large Space Telescope' to its position as one of the most scientifically productive and beloved telescopes of all time. The timelines below offer an interactive ...

On April 9, 1959, NASA announced the first astronaut group, the Mercury 7. In March 1960 the first cosmonauts were selected. On April 12, 1961, the U.S.S.R. launched the first human into orbit, Yuri Gagarin, on Vostok 1. On ...

Space shuttle, partially reusable rocket-launched vehicle designed to go into orbit around Earth, to transport people and cargo to and from orbiting spacecraft, and to glide to a runway landing on its return to Earth's surface. It ...

Discover the cosmos! Each day a ...

After the men donned their BIGs and emerged from the capsule, they waited in a raft for helicopter pickup (shown above) and were airlifted to the USS Hornet CV-12, a World War II-era aircraft carrier steaming toward the splashdown site. ...

Five times during the descent, the guidance computer triggered an alarm (called "1202" or "1201") that its memory was full, but NASA simulations before the mission showed that a landing could still happen despite the alarm, ...

NASA Science Fleet Chart NASA Science missions circle the Earth, the Sun, the Moon, Mars, and many other destinations within our Solar System, including spacecraft that look out even further into our universe. The Science ...

On November 14, 2003, astronomers spotted what was at the time the most distant known object orbiting the Sun. They called it Sedna after the Inuit goddess of the ocean. It's a cold, reddish...

On its record-breaking pass by the Sun late last year, NASA's Parker Solar Probe captured stunning new images from within the Sun's atmosphere. These newly released images -- taken closer to the Sun than we've ever been before -- ...

What is NASA's Europa Clipper spacecraft? Europa Clipper is a robotic solar-powered spacecraft built to conduct the first detailed investigations of Jupiter's icy moon Europa. The spacecraft will orbit Jupiter and make nearly ...

What was nasa called before

Artemis, U.S. crewed spaceflight program begun in 2017 that is intended to return astronauts to the Moon during the 2020s for the first time since 1972. Artemis is named after the Greek Moon goddess, the twin sister of the ...
