A China-funded national survey on mineral resources has led to the discovery of significant new mineral deposits in Liberia, offering fresh opportunities for the country's development. The survey -- the largest of its ...

China discovered nearly one million tons of lithium ore in Yajiang county, Sichuan province, marking Asia's largest known pegmatite monomer lithium ore source to date, Xinhua News Agency reported on Thursday.

Aterian Plc, a UK-based critical minerals exploration company, announced that it has found high-grade lithium deposits in Rwanda, following a drilling exercise in collaboration with Rio Tinto ...

A 48V 15A lithium battery charger is designed to efficiently recharge high-capacity lithium batteries (typically 48V systems) used in electric mobility and industrial equipment. These chargers ...

Spodumene ore is roasted at temperatures exceeding 1000°C to alter its crystal structure, making the lithium more accessible for chemical leaching. The second major source is lithium-rich ...

ARKANSAS - After finding a massive \$1.5 trillion deposit of lithium inside a supervolcano on the Nevada-Oregon border, researchers have also uncovered another game-changing lithium find. Now, according to a US ...

Small, powerful lithium-ion batteries transformed the computer industry in the 1980s and '90s with the commercialization of the laptop. In the 2000s, lithium-ion batteries allowed for the widespread adoption of cellphones. By the 2010s ...

Nigeria's massive lithium reserves, estimated to be worth over \$34 billion, are attracting interest from all around the world. Lithium is a key component of batteries for renewable energy storage systems and electric vehicles (EVs) ...

The importance of the mineral sector in Nepal is also evident from the fact that old mine pits, audits, waste places and remains of mine tailings found in many places, and villages named after mineral names such as Tama Khani ...

China has announced the discovery of a vast hard-rock lithium deposit in central Hunan Province, a find that could improve its already dominant position in the global battery-materials...

China's provincial department of natural resources has confirmed the discovery of a significant lithium ore deposit in central Hunan Province. Located in the Jijiaoshan mining area of Linwu ...

AUSTIN, Texas -- Currently, companies like Tesla are pushing for solar power and batteries to help the electric grid in Texas at times of peak demand. The bulk of the lithium produced for those batteries comes from ...

Lithium mined in Chile's Atacama desert is an essential component of the batteries that power electric cars and solar energy stores. It's key for the global green transition. But extracting it is ...

Canada has seen a surge in hard rock lithium exploration and development activity following the discovery of Patriot Battery Metals' globally significant Corvette pegmatite in Quebec in 2021.

China, among the world's largest holders of lithium reserves, has discovered a massive deposit of 490 million tonnes of lithium ore in central China's Hunan Province, the provincial department of natural resources said Tuesday.

Lithium processing plant. Credit: SRC. The number of batteries used in energy storage is rising as the world adopts more advanced technologies, particularly green energy and electric vehicles (EVs), thus increasing the ...
