"Being a member of the World Energy Council's great family is a tremendous opportunity to be connected to the newest ideas and trends in this domain, to be part of the global discussion on ways the energy sector can contribute to a sustainable development of mankind, "humanising" the industry, and to share good practices.

The World Energy Council's definition of energy sustainability is based on three core dimensions: Energy Security, Energy Equity, and Environmental Sustainability of Energy Systems. Balancing these three goals constitutes a "Trilemma" and balanced systems enable prosperity and competitiveness of individual countries.

World Energy Trilemma 2024: Evolving with Resilience and Justice. Now in its 15th edition, the World Energy Council's World Energy Trilemma Report 2024 places significant emphasis on signals from interviews and workshops with experts in the Council's worldwide community across more than 100 countries.

With this shared responsibility, it is my great pleasure to welcome you, our global community, on this Energy and Earth Day, to the World Energy Council's Centennial Congress. Each of you is a change maker and I ask you to step up and embrace this role. Together, we will shape the next century of World Energy for people and planet."

THE WORLD ENERGY COUNCIL WAS CREATED IN 1923, AND IN JULY 1924, VISIONARY DANIEL DUNLOP BROUGHT TOGETHER 40 COUNTRIES TO DISCUSS THE PROBLEMS FACING THE GLOBAL ENERGY INDUSTRY TO THE FIRST WORLD POWER CONFERENCE ... While the primary focus of the protocol was on mitigating climate change, it had notable ...

The World Energy Council recognises the value of adopting a whole energy systems approach in providing the benefits of sustainable energy to all. This energy transition is a connected policy challenge - success involves managing the three core dimensions; Energy Security, Energy Equity and the Environmental Sustainability of Energy Systems

Since 2019, the World Energy Council has developed several deep dives on hydrogen, to better understand its true potential for energy systems and energy transitions. Building on the engagement of worldwide community, the World Energy Insights on hydrogen aim to provide energy leaders with key information for decision-making on the topic of ...

World Energy Issues Monitor. For the past 14 years, the World Energy Council has diligently monitored energy leaders' perspectives on issues impacting energy transitions through the annual World Energy Issues Monitor, serving as a vital global source of critical information guiding action priorities for faster, fairer and more far-reaching energy transitions.

Healthy energy systems are secure, equitable and environmentally sustainable, showing a carefully managed balanced Trilemma between the three dimensions. The World Energy Council's Energy Trilemma Index ranks over 125 countries' energy performance on the three dimensions based on global and national data and

Bulgaria adopted The Energy from Renewable Sources Act in 2011. The Act regulates the generation and consumption of energy from renewable sources with the aim of achieving the national targets in terms of renewable energy use in final gross energy consumption ... World Energy Outlook 2023. Flagship report -- October 2023 ... Other forms of ...

To address these challenges, the government of Bulgaria has made energy efficiency (EE) a cornerstone of its energy policy. In line with the EU's climate and energy package ("20/20/20 by 2020"),¹ Bulgaria's third National Energy Efficiency Action Plan (NEEAP) 2014-2020 set two

Major regional changes. Asia is a very diverse region in terms of energy demand, economic development, demographics and geographical opportunities. The trajectories of two powerhouses in the region, China and India, are starting to diverge. 2023 was expected to be a year of recovery for China after strict COVID-19 policies severely impacted its economic development.

In 2020, the World Energy Leaders' Summit took place digitally on Thursday 8th October 12.00 - 14.00 (UTC+1). The dramatic impact of the COVID-19 crisis across all sectors, regions and society resulted in the largest capital reallocation ever seen.
