

The UK government has reconfirmed its plans for a ban on pure petrol and diesel vehicle sales by 2030, with hybrid vehicles following in 2035 for cars, leaving only zero emissions vehicles, of ...

Hydrogen vs. Batteries: Is the Future of Cars Fuel Cells or Charging? The automotive industry is in a whirlwind of change, with electric vehicles (EVs) taking center stage. But while battery ...

Zambia and DR Congo are creating special economic zones (SEZs) to lead Africa's electric vehicle (EV) manufacturing efforts. These zones aim to transition both nations from exporting ...

These components are specifically designed for automotive batteries used in battery electric vehicles (BEVs) and plug-in hybrid vehicles (PHEVs), with the expansion finalized as of June ...

Battery Electric Vehicles (BEVs) and Hybrid Electric Vehicles (HEVs) share some components, but not all: Auxiliary battery: Both BEVs and HEVs use an auxiliary 12V battery for low-voltage systems (lights, infotainment, etc.).

Dominant Segments: Battery Electric Vehicles (BEVs) are leading the passenger EV space, with SUVs and subcompact SUVs dominating sales. Tata Motors remains a frontrunner, driven by ...

A new guide to Zambia's critical minerals highlighting the country's current and potential critical mineral resources, including cobalt and lithium, was launched this week in Lusaka. " Critical minerals potential of Zambia ", now available to read ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

In some cases--like with regenerative electric locomotives such as the Fortescue Infinity Train--machines can even recharge themselves, eliminating fuel costs entirely. When ...

Hydrogen fuel cell cars (FCEVs) have been on the market for a similar duration to the current wave of battery EVs (BEVs). But they have sold a tiny fraction in comparison. In 2024, 12,866 ...

Guidance for car manufacturers on how to apply for their vehicles to be eligible for the Electric Car Grant. The guidance explains: how the scheme works vehicle eligibility the application process ...

BMW Group has announced its commitment to hydrogen fuel cell technology, planning to launch its first hydrogen-powered vehicle into series production by 2028. This move positions the ...

Zambia battery electric vehicles bevs

The once-accelerating transition to battery electric vehicles (BEVs) in the U.S. has hit a speed bump. Slowing consumer demand, infrastructure limitations, and shifting regulatory signals ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

The storage is provided through a combination of fleet vehicles and stationary batteries with Nuvve Corp as the aggregator. Thus, in addition to functioning as vehicles for their primary ...

Battery Electric Vehicles (BEVs) now dominate powertrain installations, making up nearly 71% of the total demand across major regions. Battery packs account for about 38% of the market ...

"The good news is a hydrogen vehicle is an electric vehicle," says Guldner. "It's just a different way of storing the energy versus a battery, which also means that we can reuse a lot of the ...

Imports of battery electric vehicles (BEVs) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

The global electric vehicle (EV) market is witnessing a significant resurgence, with sales in the first half of the year exceeding 5.9 million battery electric vehicles (BEVs), according to a ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...
