

How does myenergi Zappi work?

The myenergi zappi seamlessly connects your electricity supply to your electric car. Once installed, simply plug in your EV and enjoy hassle-free electric car charging from the comfort of your sofa. Simple, eh! With zappi, you'll also benefit from our clever app that allows you to utilise economy tariffs and boost your charging speed.

Does myenergi's Zappi Charger work with other eV Products?

It also works with other MyEnergi products MyEnergi's Zappi charging point is a smart EV charger for homes and businesses. It's available in four versions, each of which comes in white or black.

Can a Zappi work with a battery inverter?

a hardwired CT is 100A Battery If the property has a static AC battery system installed, it is possible to get the zappi to work in harmony with the battery system, provided a CT has been installed to monitor the battery inverter. See Battery Storage Systems (page 41) for more information [ngFunction DescriptionNoneThere](#)

4 ???· Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

You should try to get the Zappi v2.1 with Lan/wlan. then the HUB is integrated in the Zappi and you only have to bring the lan with a powerline adapter to the zappi. The only challenge that remains is the Harvi for the ct. This is necessary for the timers! the Harvi is still connected to the zappi at 868mHz. See also here:

Zappi versions that do not have the -T suffix comply with EN 61851-1:2019 with the exception of Clause 8.4 in order to meet the requirements of BS 7671:2018 Amendment 1:2020 which requires the protective earth conductor to be ...

MyEnergi's Zappi charging point is a smart EV charger for homes and businesses. It's available in four versions, each of which comes in white or black. Tethered Zappis have a type-two charging ...

Set device priority so that Zappi is #1 and Eddi is #2. Your myenergi system should then behave as you wish. Note that the Eddi may consume the available surplus before there is enough for the Zappi. The Zappi needs a minimum of 1.4kW for single phase and 4.2kW for three phase.

myenergi will install a zappi 22kW untethered Zappi at your premises or at a location of your choosing. The zappi must be within 20m of the nearest distribution board; Wi-Fi connection is your responsibility; All transactions are subject to our sales terms and conditions at Terms and Conditions for the Sales of Goods and Services - myenergi ...

Myenergi do allow customers to purchase the optional 8M lead that the V1 came with, if you do wish to do that please speak with our sales team. If you have a V2 Zappi the only way you can get a longer cable and keep the warranty is to have a untethered unit and then you can have as long as you want for a cable.

additional support for 3 phase systems, allowing connection of a single phase zappi in a 3-phase 3-wire supply, and to allow the ECO+ mode to be used on a three-phase zappi with all three phases energised. The way i read it, this allows the Zappi 1 to be able to be used with 3-phases, which is not possible. <Confused> Richard

bobtaylor364 wrote: We've recently joined Intelligent Octopus (IO) which offers a 7.5p off-peak charge between 11:30pm and 5:30am. However, as soon as we plug the car in, the IO app often schedules the charge during daylight ...

Hi I wondered if you are working with Octopus energy to enable the Intelligent octopus service to work with Zappi chargers. I am guessing they are working on only allowing the car to charge in off peak time, and so need additional information to make this happening.

New Zappi, single phase, untethered, Ampera. Won't release the cable once charged or if the car is disconnected (type 1 so not locked in) Seems the only way to get the cable out is to turn off the Zappi. I'm guessing this a setting unless the Zappi has a bug. Charging complete get a flag but no + as the manual suggests. Lock settings EV Plugged ...

The Zappi 2 has been performing happily since the start of the year but has started persistently tripping its breaker after around 30 minutes of charging at 7kW. It does this with both of our cars (a Zoe and e-niro). ... It would be great if someone from Myenergi could chime in here. johnkorr. 12 2. johnkorr. 12 2. Post Sep 30, 2022 #9 2022-09 ...

At myenergi we pride ourselves on providing our customers with the highest quality, UK made, EV home chargers. It's only natural that we want to ensure our customers get the best experience when looking to get their zappi installed. That is why we have personally handpicked some of the best myenergi-approved and trained installers in our network.

A couple of days ago I updated my Zappi v1 but I encounter several problems. This is the first picture I'd like to start with. Maybe this is not related to the update, but this is the 3th time since the update this is on the display and of course, Zappi and Harvi are red on the Hub.

How do I find out whether my Zappi is v1 or v2? On the dashboard under my devices it says it is "SN 16114463 · v3560S3.147" but it doesn't actually say what sort of Zappi it is. If I download the technical info it gives a different serial number - "ZAPPI -207TW" but that doesn't say if it is a 1 or a 2 either.

I have 3 phase system with following set up: Zappi, each CT on each phase all set to grid Harvi, each CT on each phase of PV/battery input as per the ... myenergi & General & General Discussion & 3 phase

Come on guys, its a great unit but you can do better than this. I think the unit is great but the manual supplied for the Update process must be for the Zappi 1 as it bore no relation to the switches on the Zappi 2. I did download the latest firmware to the Hub as instructed and found the bootloader menu in the Advanced options on the Zappi.

I find the Zappi handbook badly written. There are many examples of its versatility but there are many more options on the control panel than are desc. ... Myenergi support will sort it for you I am sure. prawlin. 4,488 2,241. Grand Master. prawlin. 4,488 2,241. Post Aug 04, 2021 #8 2021-08-04T18:39+00:00.

Unfortunately some cars see any repeated charging stop starts as being a possible fault with the charging point (it isn't in this case). So the car ceases to charge until it is reset by unplugging or by unlocking locking etc. Zappi using solar energy on ECO+ will inevitably stop and start as clouds pass over or household loads take priority.
